
How a country can attain sustainable growth.

- The GDP, Energy, Tourism, Human Resources and Business data was taken and a new feature GDP/Capita was considered for this Analysis.
- Urban population is the one which contributes most to the growth of a country.
- Regions with a higher Birth Rate and Infant Mortality Rate shows a decrease in the GDP/Capita
- The Internet Usage also contributes positively to the growth of a country.
- The regions with a Higher male and Female Life expectancy shows an increase in the GDP/Capita i.e. contributing positively to the growth of the country.
